INTRODUCTION

Morkie Inu is a decentralised Binance smartchain all in one platform. Morkie Inu (\$MINU) is a new breed of meme coin on a mission. Focuses on utility in the form of a Morkie Swap, our in-house dexterity. Morkie Inu is restoring meme currency integrity by developing the safest Dex and Launchpad in space. MorkieSwap contains our trade, Honeypot Checker, MorkieTools, NFT and much more.

The MORKIE INU TOKEN protocol assures that token holders' assets are instantly locked for liquidity. MORKIE INU TOKEN's secret is Automatic LP. The MORKIE INU TOKEN LP's price stability mirrors this function, with the extra benefit of a hard price floor and cushion for holders. All of this is done to alleviate some of the difficulties that have been identified with the existing DeFi reflection tokens.

The circumstances and quantities of the buy-back and burn will be tracked. MORKIE INU aims to carry out a long-term burn strategy that is both healthy and fun for individuals who take part. One percent of each transaction will be used to burn the wallet. The circumstances and volume of the fire are made public and are being watched. The contract's revenue sharing part is utilised to acquire tokens on the open market and subsequently burn those tokens.

MORKIE INU systems are connected with the world's leading cryptocurrency trading exchanges, allowing users to find and choose the best transaction rates. This platform is intended to allow users to safely swap tokens without depending on centralised services or giving up control of their private keys. As a decentralised exchange, all deals are automatically completed using smart contracts, removing counterparty concerns.

MORKIE INU developers intend to establish a DEX to meet the demands of completely decentralised payments. It will be a simple, quick, and secure exchange that is genuinely decentralised. The Exchange is non-custodial, which means that when a user transacts on a DEX platform, they retain ownership of their private keys.

Using the MORKIE INU Launchpad development services, creators may raise funds to create, launch, and sell their creations. We've built a Launchpad to help future artists raise funds for their projects.

MORKIE INU Launchpad is a blockchain-powered platform that bridges the gap between investors-fundraisers and cryptocurrency's decentralised protocol.

We plan to offer 2D and 3D NFT to provide consumers with a one-of-a-kind creative experience. Our NFTs are unique, non-replicable cryptographic tokens that function as assets in the digital realm. MORKIE INU NFT is a critical component of our NFT ecosystem. Non-fungible coins (NFTs) are one-of-a-kind, non-transferable assets that are minted on-chain. MORKIE INU NFT is NFT Creation's 2D/3D art-themed series. These tokens may be tied to anything, starting with the digital MORKIE INU token.

Vision

We aim "cryptocurrency to be in every portfolio." We envision a society in which wealth-building tactics that were previously solely available to the affluent peoples are made open to everyone, restoring people's control over our financial institutions.

MORKIE INU will build a revolutionary Defi ecosystem to attract more people to digital assets. It will create a safe and secure legal platform that is positioned for global adoption with no limitations, allowing users to earn a handsome income while maintaining their privacy, security, and autonomy.

We want to identify the talents working with the current Agent network. We envision promoting our many revolutionary programs like NFT, Swap, DEX, and Giveaways.

The present State of Industry

During the early days of the crypto industry, one of the major challenges users faced was determining how to buy and sell digital currencies they held. The beginning and end point of interacting with cryptocurrencies will necessitate the ability to participate of the majority, if not all, in crypto to fiat and fiat to crypto conversion. As a result, cryptocurrency users were heralded to the introduction of cryptocurrency exchanges, which were and continue to facilitate trading in digital assets. There are two kinds of cryptocurrency exchanges: centralised (CEX) exchanges and decentralised exchanges (DEX). Notably, centralised exchanges (at least 90%) are the most widely used in the digital assets industry due to their simplicity, relatively good user experience, and support for multiple cryptocurrencies and fiat currencies.

Challenges of Centralized Exchanges

During the early days of the crypto industry, one of the major challenges users faced was determining how to buy and sell digital currencies they held. The beginning and end point of interacting with cryptocurrencies will necessitate the ability to participate of the majority, if not all, in crypto to fiat and fiat to crypto conversion. As a result, cryptocurrency users were heralded to the introduction of cryptocurrency exchanges, which were and continue to facilitate trading in digital assets. There are two kinds of cryptocurrency exchanges: centralised (CEX) exchanges and decentralised exchanges (DEX). Notably, centralised exchanges (at least 90%) are the most widely used in the digital assets industry due to their simplicity, relatively good user experience, and support for multiple cryptocurrencies and fiat currencies.

A. Security Concerns

Cryptocurrency exchanges are platforms that hold billions of dollars in Bitcoin and other cryptocurrencies for their consumers. Centralized exchanges function in the same way that traditional businesses do. As a result, they serve as custodians of users' funds. More than \$11 billion in assets has been stolen through bitcoin trade since 2011. This demonstrates that storing user funds in such platforms should be or is a big problem for traders to address when entering the crypto realm.

The present State of Industry

B. Withdrawal Limits

A significant disadvantage of employing centralised exchange, which is visible across all platforms, is that they limit customers' daily, monthly, and annual withdrawal amounts. Cryptocurrency exchanges, on the other hand, believe that this is regulatory compliance imposed by authorities to prevent users from engaging in fraudulent activities such as money laundering and funding unlawful acts.

C. Huge Transaction Fees

Trading on centralised exchanges attracts high transaction fees in exchange for the custodial and middle-party services they provide to consumers. These exchanges frequently calculate in the hazards of keeping a large volume of money for crypto users, and a percentage of this fee is passed on to the end user. Transacting with central exchanges, for example, often incurs a direct price of at least 0.25 percent each transaction, as well as an extra network fee and various hidden expenses.

D. Liquidity Concerns

Currently, 99 percent of industry crypto transactions occur on centralised exchanges, which control the vast bulk of market trading activity. As a result, decentralised exchanges handle relatively low trade volumes, resulting in liquidity difficulties where buyers and sellers must wait for extended periods of time when trading volumes are low.

Our Solution

A brand-new DeFi ecosystem has been created.

We want to have a vibrant ecosystem with more partners and developers at the top of our priority. The MORKIE INU will provide complete support to users, including financial, technological, and community interaction. We will regularly examine each application and provide feedback.

Liquidity released indefinitely

Over-collateralization and LP pledging with liquidity certificates are two approaches that MORKIE INU will continue to support. It will also provide MDEX with various application scenarios and liquidity benefits, allowing customers to generate big profits while drastically increasing capital use efficiency.

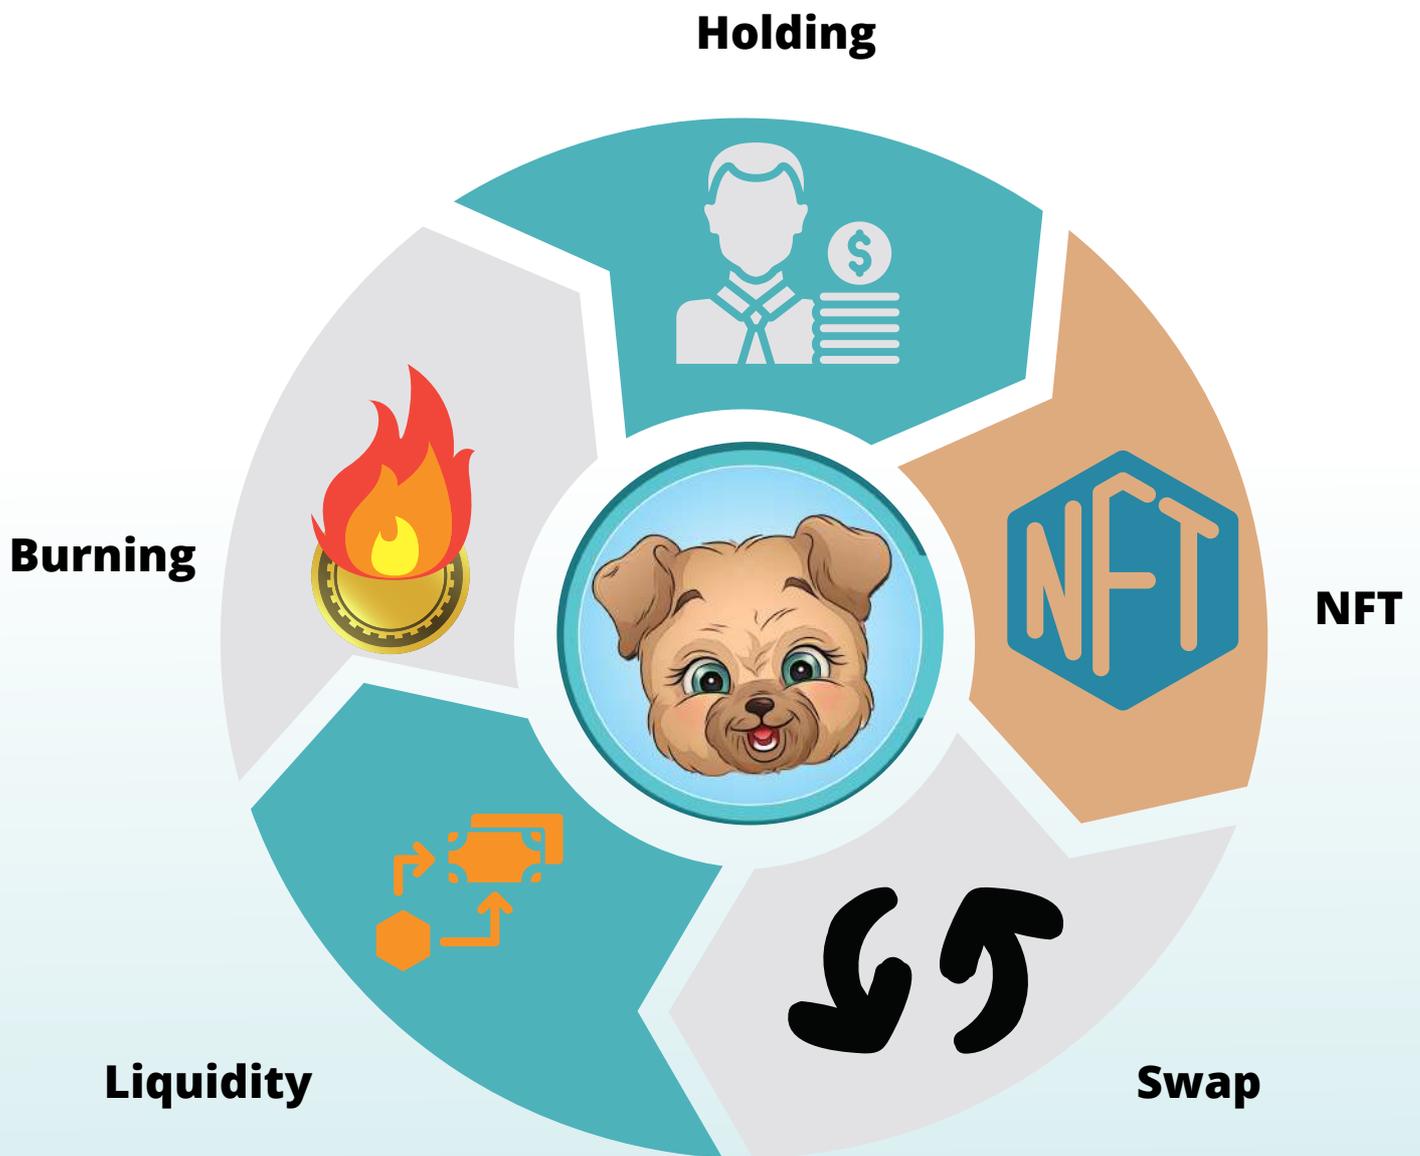

MARKIE INU Swap

This platform is designed to allow users to securely Swap Tron, Solana, Binance Coin (BNB), Ethereum, and many other tokens without relying on centralized services or losing control over their private keys. But People can buy and sell tokens through Markie Swap. All trades are automatically executed via smart contracts as a decentralized exchange, eliminating counterparty risks.

Real-time transactions & Charts

Markie Inu was given to liquidity providers in exchange for their services. Users pay the fees to trade on Markie dex, which is distributed to liquidity providers based on the number of LP tokens they possess or the percentage of the pool they own. Because LP provides liquidity, they may incur a slight reduction and may not receive the same quantity of returned tokens. The main purpose is to keep the holder informed about the performance of the Markie Inu Token by preventing whale dips when used in a huge trade-off.

Ecosystem

Liquidity

Liquidity providers are rewarded with LP tokens for Providing liquidity. Users pay trading fees on DEX, which are distributed to liquidity providers based on the number of LP tokens or percentage shares they own in the pool. 1% of every transaction will be added to liquidity pool.

The MORKIE INU TOKEN protocol ensures that the assets of token holders are immediately locked for liquidity. The primary purpose is to keep the holder updated on the performance of the MORKIE INU TOKEN by avoiding whale dips when they are used in a mass trade-off.

The secret of MORKIE INU TOKEN is Automatic LP. We have a function for holders with a dual-beneficial implementation. To begin, the contract collects tokens from both sellers and buyers and adds them to the LP, thereby establishing a consistent price floor. In principle, the additional LP provides stability by adding the tax to the token's total liquidity, thereby increasing the token's overall LP and maintaining the price floor.

This differs from other reflection tokens' burn function, which benefits only in the near term from the given supply decrease. The price stability of the MORKIE INU TOKEN LP mimics this function, with the added advantage of a firm price floor and cushion for holders. The idea is to minimize huge price dips later in the game when whales opt to sell their tokens, preventing the price from fluctuating as much as it would if the automated LP mechanism wasn't in place. All of this is done to address some of the issues with the current DeFi reflection tokens. We are confident that our system and protocol will triumph over outdated reflection tokens for these reasons.

Burning

The buy-back and burn's circumstances and proportions will be monitored. MORKIE INU seeks to carry out a long-term burn plan that is beneficial and enjoyable for those who participate. Additionally, burns help reward and enlighten the community as well, as they will raise the token value by becoming scars. 1% of every transaction will be gone to burn wallet. The circumstances and volumes of the burning are made public and monitored. We will allow our users to monitor burning quantity allowing for greater transparency in assessing the current circulating supply at any given time.

The revenue share portion of the contract is used to purchase tokens on the open market and then burn those tokens. When the companies pay back the principal portion of the revenue share agreement, those proceeds will be used for new revenue agreements with additional companies in perpetuity. Through this process, we have a continuous revenue stream that acts as a liquidity pool to support the value and growth of the token.

Swap

This platform is designed to allow users to securely Swap tokens without relying on centralized services or losing control over their private keys. All trades are automatically executed via smart contracts eliminating counterparty risks as a decentralized exchange.

There are several reasons our Wallet users love using MORKIE INU

- Quickly swap into an asset you believe will grow.
- Move out of a volatile asset into one of our MORKIE INU Tokens against real-world events.
- MORKIE INU platforms are integrated into the world's top cryptocurrency trading exchanges, allowing users to search for and select the best transaction rates.
- Users can easily convert their assets into MORKIE INU tokens from other cryptocurrencies such as ETH, BNB, MATIC, USDT, USDC...or directly use credit cards.

DEX

MORKIE INU developers are planning to launch a DEX satisfying the needs of fully decentralized payments. MORKIE INU is making it easy and convenient to connect and process transactions, breaking any user-touchable space close to the future world the dominant cryptocurrency.

MORKIE INU will guarantee the outstanding speed of token processing and extremely low transaction fees so that the community can easily connect. It will be an easy, fast, and secure exchange in a truly decentralized way. It is a place where people can exchange their tokens for the desired ones. The Exchange is non-custodial, meaning a user remains in control of their private keys when transacting on a DEX platform.

Advantages

1-No KYC/AML

KYC/AML (Know Your Customer and Anti-Money Laundering) compliance is the norm for OUR exchanges. For regulatory reasons, individuals must often submit identity documentation and proof of address. Our DEX doesn't demand any of documents for verification purposes make the user completely anonymous.

2-Additional Features:

- Multi-layer Security
- Preferred Trader Selection
- Admin Panel
- Support Team

MORKIE INU DEX Tools

MORKIE Dex Pool

At MORKIE INU, we seek to make blockchain data simply accessible and understandable. Get real-time information on swapping, adding, or deleting digital assets from AMM's liquidity pools.

MORKIE INU Alerts

Invest in the best and safest APYs from numerous pools on decentralized exchanges to increase your money.

MORKIE INU Lunchpad

There is an onboarding menu for incubator ventures, seed rounds, private sales, and public rounds. You may invest in the top start-ups and get a fair return on your money.

MORKIE INU Track Pair

We provide information on newly developed and tested pairs for community distribution and transaction security.

MORKIE INU Charts

Our API charts allow you to get information on token prices, trading pairs, traders, AMMs, on-chain transactions, and more at MORKIE INU.

Launchpad

MORKIE INU launchpads are similar to IDO launchpads in that they enable new producers and developers by connecting them directly with needed audiences, generating funds, and assisting them in finding their footing in the market.

MORKIE INU Launchpad is a platform that helps people to create and launch NFT, gamify and metaverse initiatives. The creators can boost finances to develop, launch, and sell their projects by using the MORKIE INU Launchpad development services. These are comparable to IDO Launchpads.

We have created a Launchpad to assist potential creators in raising financing for their initiatives. Our engagement in the crypto sector, as well as our interest in the NFT area, resulted in significant inventions that helped to elevate and excel the renowned industry by releasing its full potential to the market. The success of a technology is on its ability to reach all corners of the globe and help people comprehend how to use it. We created the effort to assist creators in minting and selling NFTs so that they may benefit from the revenues and opportunities that NFTs provide by having a distinct portfolio for their ideas.

MORKIE INU Launchpad is a blockchain-supported platform that fills the gap between the investors-fundraiser and the decentralized protocol of cryptocurrency. Our aim is to connect the world for borderless transactions for the fundraising of a new project while giving the investor the ability to research a new coin. We provide an opportunity for investors to better educate themselves through more information globally, with less uncertainty by using the Multichain-compliant lift platform. We can eliminate manual errors and ensure stability, clarity, and immutability during recording by leveraging state-of-the-art Multichain-based smart contract technology.

MORKIE INU helps new projects attract the community, by allowing them to list their new coin, prior to launch, on our innovative MORKIE INU Launch directory which contains all the details related to the coin/token along with their official website, and the link to their telegram is hyperlinked on website.

A whitelist IDO is also a key feature of our launchpad, it means that you have to register in advance to participate in the IDOs, which are usually hallmarks of popular IDOs that have a limited number of coins to offer.

KYC is the verification process that customers to go through in order to:

- Verify their identity and link it to a wallet
- Get a better understanding of the potential customer's activities and determine whether or not these are of legal nature.
- Evaluate the possibility of money laundering risks associated with a particular customer.

NFT

We are going to launch 2D and 3D NFT to provide unique art experience to their users. NFTs are intended to increase market efficiency, notably when dealing with cryptocurrency. Our NFTs are non-replicable and customised cryptographic tokens that are regarded as assets in the digital world. They may be bought, owned, and sold just like any other tangible property. To ensure that the ownership of the tokens stays distinct and verifiable, effective blockchain technology is used.

We are going to launch our NFT collection. The collection of physical and digital items collected by collectors around the world. We are using blockchain technology to empower creatives. Our ultimate goal is to create a community of people who can show off what they own and get recognition for their collections.

MORKIE INU NFT is a vital part of our ecosystem dealing with NFT'S. Non-fungible coins (NFTs) are unique, non-interchangeable assets, minted on-chain. MORKIE INU NFT is the 2D/3D art-themed series of NFT Creation. These tokens can be linked to anything from digital MORKIE INU token. The core attributes of NFTs give them unique value and categorically separate them from other types of assets. These properties include being verifiably unique and indivisible.

The transparent nature of the underlying code means that the scarcity and ownership of any given token are evident without the need for a trusted intermediary. The underlying token for each MORKIE INU encodes a unique genome that defines its appearance, traits, and hereditary lineage. MORKIE INU cannot be replicated and cannot be transferred without the user's permission.

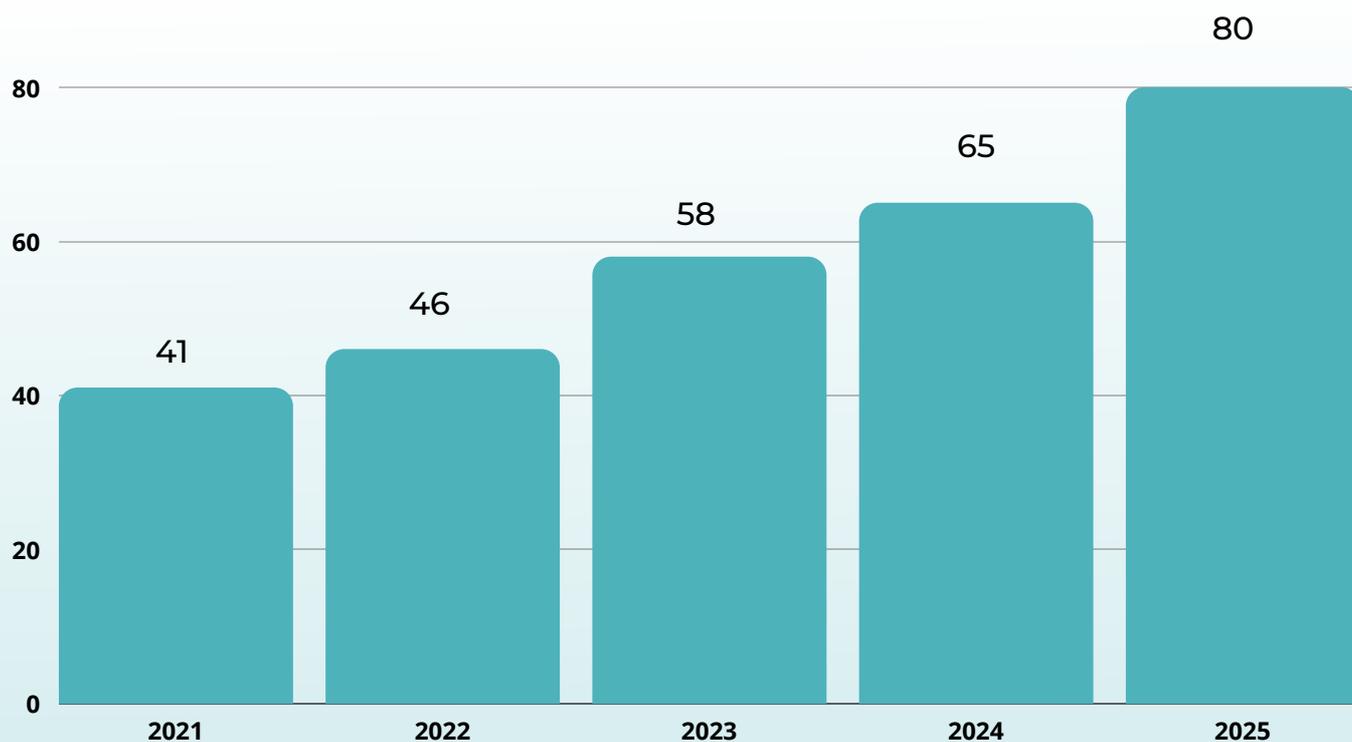

MORKIE INU NFTs provide purchasers with access to many types of digital assets, primarily cryptocurrencies. Owning these assets gives you enough flexibility to expand. Simultaneously, MORKIE INU NFT enables numerous purchasers to hold a share in a single organisation. Because of the growing value of cryptocurrencies, shared ownership is critical.

Global NFT Marketplace

According to a recent estimate from blockchain analytics firm Chainalysis Inc., about \$41 billion worth of bitcoin was connected with smart contracts related with NFT markets and collections from the beginning of 2021 until mid-December.

Last year, the popularity of non-fungible tokens (NFTs) skyrocketed, with multimillion-dollar sales and celebrities like musician Shawn Mendes, socialite Paris Hilton, and former first lady Melania Trump are on board.

The NFT market is predicted to expand at least 33% annually, reaching \$80 billion in net sales volume by 2025 and almost \$350 billion by 2030. Though this may appear to be a large amount, we are convinced that the market's real growth will much exceed the investment Jefferies' forecasts.

How to get MORKIE INU?

STEP-1

Download & setup MetaMask or TrustWallet

Download MetaMask (a crypto wallet in the form of a browser extension) or TrustWallet (an app for your phone). After that you will have to add the Binance Smart Chain to your network-list.

STEP-2

Buy and send BNB to your wallet

Buy BNB on an exchange (i.e Binance, Kraken, Coinbase etc.). Transfer the tokens to your wallet address. BEP-20 addresses start with a "0x".

STEP-3

Head on to PancakeSwap and swap for \$MINU

Head on to PancakeSwap and use this address 0x to select \$MINU. Set the slippage tolerance to 9% (sometimes it may be 11%, depending on how much demand there is.)

STEP-4

Swap BNB for \$MINU Now you need to add \$MINU to your MetaMask or Trust Wallet to view your \$MINU.

View \$MINU and HODL

MORKIE INU TO THE MOON

Why Choose MORKIE INU?

MARKETING & HIGH REACH

We want to focus a lot on marketing because this is the most important thing to keep a project alive. We say this because we have years of experience in the crypto and blockchain business and have generated over multi million dollars. For this, we will be putting a large part of our wallet into marketing which will take the our project to another level.

Community Driven

We are a one-stop-shop that cuts down on the number of tabs you have open simply to trade. We think that a good user experience will help you be more efficient in making more trades that are informed because we are traders ourselves. Meta Dex will assess other blockchain networks' pairings and projects, and the service will always be free to the community.

Social Network

MORKIE INU is planning a massive international media tour to promote the collection to millions of people. The goal is to get as many people involved as possible, help them with their investments, or connect them with the right community. We are not hyping this project at all. We are providing real utility, passive income, and a fun way to invest in your future.

One-stop-shop for descendants

MORKIE INU will employ DeFi Lego recombination to generate new derivatives like leveraged trading gradually, options trading, and prediction markets, providing users with fuller, more efficient, and reliable products while also enhancing the benefits of Morkie owners.
